

Sense Organs

Sense organs are the body parts that help us to know what is happening around us. We have five sense organs – eyes, ears, nose, tongue and skin.

We **see** and **watch** things with our **eyes**.

We **hear** sounds with our **ears**.

edusol

We **smell** things with our **nose**.

Rainy Season

We wear raincoats. They keep us dry. Raincoats are made of rubber. We also use umbrellas and gumboots.

Winter Season

We wear woollen clothes in winter. They keep us warm.

Intext Assessment

Look at the picture and answer the questions.

1. What are these? _____.
2. Where do you wear them? _____.
3. Why do you wear them? _____.

In a Nutshell

- Food is one of the basic needs.
- Food gives us energy. It makes us strong. It keeps us healthy.
- We eat three meals a day – breakfast, lunch and dinner.

Facts

We get food from plants and animals. Plants give us grains, pulses, fruits and vegetables. Animals give us milk, eggs, fish and meat.

Practise

A. Tick (✓) the correct option:

1. Radish and carrot can be eaten **raw/cooked** as a salad.
2. We have **lunch / breakfast** in the morning.
3. **Lunch / Dinner** should be the lightest meal of the day.
4. We get eggs and milk from **plants / animals**.

At home

Do not leave toys on the floor. Someone may trip and get hurt.

Do not walk on wet floors. You may slip and fall.

At School

- Do not run in the corridors.
- Do not jump on desks and chairs.
- Be careful while climbing the stairs.
- Stand in a queue while getting on or off a bus.

Work Corner

Fill in the correct colours to indicate the following on the traffic lights.

stop

wait

go

People Who Help Us

I will learn about:

- Different people who help us every day

Different people do different kinds of work. Many people help us in our daily life. We should respect and thank them.

A **farmer** grows crops.

Do remember

We must be kind and thankful to the people who help us.

A **mason** builds houses.

A **tailor** stitches clothes.

A **weaver** makes cloth.

Types of houses

People live in different types of houses.

Bungalow:

A bungalow is a strong house made of bricks, cement and iron. Such houses are called

pucca houses. A house has windows, doors, walls, etc. We should keep them clean and closed when needed.

Special kinds of houses:

Huts, houseboats, igloos, tents and caravans are special kinds of houses.

hut

houseboat

igloo

tent

caravan

National festivals

National festivals are celebrated by every Indian.

Independence Day

Independence Day is celebrated on **August 15**, the day India got freedom from British rule in 1947. The Prime Minister hoists the National Flag at the Red Fort on this day. We sing the National Anthem "Jana Gana Mana" and the National Song "Vande Mataram" on this day in our schools.

Republic Day

Republic Day is celebrated on **January 26**, commemorating the day India became a republic. A parade showing the cultures of India is organised in Delhi on Kartavya Path (the Path of Duty, formerly Rajpath). The President of our country takes the salute.

Gandhi Jayanti

Gandhi Jayanti is celebrated on **October 2**, the day Mahatma Gandhi was born. He fought for India's freedom.

Parts of a Plant

Let us take a look at the various parts of a plant. The two main parts of a plant are the stem and the root. The stem grows above the ground. The root grows below the ground. The stem has buds, leaves, thorns, fruits and flowers.

The **leaf** is mostly green in colour. It makes food for the plant.

The **stem** carries food and water to all parts of the plant.

The **flower** is the most beautiful part of the plant. It changes into a fruit.

The **fruit** has seeds inside it.

The **root** holds the plant in the soil. It takes water from the soil.

Exercise

Look at each leaf and write the names of the plants in the space given.

Air Fills Up Space

Air fills up empty space. It gives shape to things.

Exercise

Take a balloon and blow air into it with your mouth. The balloon becomes bigger because air takes up space inside the balloon.

Air Has Weight

It might seem to us that air does not have weight, but it actually does have weight.

Exercise

Take a long wooden rod. Tie a string at its centre. Tie an air-filled balloon at one end of the rod. Tie a balloon without air at the other end. Hold the rod with the string. The rod will bend towards the side where the air-filled balloon is tied. The air-filled balloon is heavier because it has air in it. This shows that air has weight.

B. Read the clues and write the correct word in the blank spaces. Also, circle them in the word search.

1. It helps a kite to fly. _____

2. It is the moving air. _____

3. It is a very strong wind. _____

4. Air is needed to light it. _____

5. It is precious. _____

Circle the things in which we can fill air.

Project Idea

Make your own parachute. Things required:

A thin plastic sheet, four strings and a ping-pong ball.

Method:

- Take a square piece of a thin plastic sheet.
- Take four strings of the same length and tie them to the four corners of the plastic sheet.
- Tie the open the ends of the four strings to a ping-pong ball.
- Your parachute is ready. Test your parachute by dropping it from a height.
- Watch it come down.
